

Buying a new device for 2019? Here's what you should get:

1. We recommend devices with enough RAM to handle larger e-books that contain mathematic equations, videos and a large number of images.
2. A cellphone is not recommended as an e-learning tool.
3. If you are using miEbooks as an e-reader only, and not as an e-learning tool in your school/institution, you can use a device with 8GB or more internal storage space.
